TUĞRUL YILMAZ

Information Systems Engineering

I am a 3rd year student at Piri Reis University Information Systems Engineering. I learned various programming languages and did small projects. While seeking professional experience, I built a strong technical foundation through coursework and projects. These experiences have strengthened and continue to strengthen my passion for technology.

WORK EXPERIENCES

2023-2024

SUPERMOTOR SPORTS WEBSITE

A website project was designed to provide information about supermotor sports, announce events and bring sports enthusiasts together. The site includes main features such as event calendar, information about athletes, gallery, news and contact form. In the project, site structure, style and dynamic content were provided using HTML, CSS and JavaScript technologies. Users can browse events, get information about athletes, browse the gallery and follow current news on the site.

2024-2024

QUIZ APPLICATION

The quiz application project aims to test users' knowledge levels and provide an entertaining learning experience by offering quizzes on various topics. The application features questions in different categories, true/false feedback, score tracking and a user-friendly interface. This project was developed using Android Studio, Java, XML and SQLite technologies. Users can answer questions, get instant feedback, and see results within the app.
